We are enclosing a copy of a letter recently received from our distributor in Australia. This letter refers to the Model 700 which failed the Commonwealth Police Department Test.

Copies of the examining officer's report, as well as his comments are also enclosed. This problem is similar to the one experienced with the Model 600. The solution found for the Model 600 was a special bolt plug to be fitted to these firearms. We would appreciate your help in finding a solution for the problem concerning the Model 700.

Thank you in advance for your assistance.
