REMINGTON ARMS COMPANY, INC.

INTER-DEPARTMENTAL CORRESPONDENCE

"CONFINE YOUR LETTER TO ONE SUBJECT ONLY" _____

Ilion, New York
December 12, 1978

TO: C.B. WORMAN

FROM: A.A. HUGICK

SUBJECT: M/700 BDL RIFLE - 7 mm x 06 REM. CALIBER PILOT LINE TEST

INTRODUCTION:

The new Cartridge 7 mm-06 Remington is scheduled for addition to the M/700 Rifle Line. Chamber and bore dimensions of the 7 mm-06 Rem. are identical to the 280 Rem. Chamber and bore dimensions.

TEST OBJECTIVE:

Conduct M/700-7 mm-06 Rem. BDL Rifle trial and pilot test.

TEST CONCLUSIONS:

1. The sample Rifles received were not acceptable per visual inspection - letter dated October 17, 1978.
2. Design specification measurements, accuracy and field cycle test results were considered acceptable.
3. Live unload is a malfunction problem with the M/700-7 mm-06 Rem. Caliber Rifle. BUT this is a functional problem in M/700-7 mm Rem. Mag., 30-06 Spfg., and 22/250 Calibers and Arms Service does receive some complaints of this malfunction. This will be reviewed by design.

M/700 BDL Rifle - 7 mm x 06 Rem. Caliber
Pilot Line Test

Dec. 12, 1978
- 2 -

FUTURE WORK PENDING:

1. Select Trial & Pilot sample Number Two for visual inspection.
