R. H. Bisaman, M.D.
Box 2510
Big Spring, Texas 79720

Dear Dr. Bisaman:

We have not run tests on the M/660 to compare the accuracy of the rifle from cold to hot conditions. We have tested the rifles in both hot humid conditions and cold conditions and found the accuracy satisfactory in both conditions. It would be an interesting test, however.

Your friend should have no problems as a number of these rifles are presently being used in Alaska in the same type of applications.

Sincerely,

J. P. Linde, Manager
Manual Firearms Design
Illion Research Division
