Today, the Remington Arms Company, Inc., announced the RP-160 recall of Models 600, 660, Mohawk 600, and antiber bolt action guns, produced prior to February, 1975, because of a possible safety problem.

October 24, 1978

As a Remington Recommended Gunsmith, your shop has been listed with an 800 Enterprise message receiving center in Atlanta, Georgia. Upon receipt of a call from an owner of one of the guns involved, the message receiving center will direct him to the Remington Rocommended Gunsmith located geographically nearest to him, for repair of the gun. We estimate you may receive up to 200 of these guns for repair.

To provide the simplest and most positive repair, you will be supplied with new trigger assemblies for replacement of the original. The repair will be done at no charge to the gun owner.

Our Arms Service section reports that the replacement of the trigger assembly can be made in 7-1/2 to 10 minutes. Based on this, we plan to allow you a \$5.00 bench charge for this work. Where transportation or other special handling costs are involved, we will reimburse you.

While full details have not been developed, we did want to give you this advance notice, and we will contact you in the very near future, covering all details.

, Meanwhile, should any guns be returned to you, please record the date, name, address, zip code, and serial number and caliber of the gun, and hold until you have our instructions.
