RESEARCH MONTHLY REPORT

Effective with the April report, we will institute a new reporting procedure and schedule. Detailed reports will be issued quarterly in April (1Q), July (2Q), October (3Q), and January (4Q). The reports should be issued no later than the third working day of the month.

The monthly report will be replaced by the highlights report which introduces the previous monthly report, except that highlights of some of the product status items might be included.

Note to Ayers: add a cover note to the April highlights report explaining the new procedure.

We have a show of interest in Du Pont regarding our quarterly report. I sent them the March report titled as a quarterly report.
