**Subject:** M/710 Firing Pin Tips & Heads

**Importance:** High

Matt,

Just wanted to give you a heads up on another issue we just became aware of. Found one gun where the firing pin tip was loose. After this we went back and looked at 23 of the most recent T & P guns.

- 8 of 23 had loose firing pin tips
- 13 of 23 had loose firing pin heads

We also went back to Phase II DAT product and also found a percentage of these loose. Looks like the threads possibly were not cleaned adequately prior to any lock-tite application. Call if you have any questions.

Scott
