Dear Tom;

Have a need - hope you can help us. Would like to obtain three barreled receivers. Rejected or scrap parts would do us just fine so long as the scope mount areas of attachment are O.K. The needed models are: 7400/7600 a 700 Short Action and your new model 7, (if the latter designation is correct).

Hope this isn't too big a request. Drawings simply are not enough for us. Barreled receivers are better for us to have around - they don't "walk off" like complete rifles if they aren't locked up.

Anyway, what ever you can arrange will be most appreciated.

Kindest regards,

J. V. Slack
