

5.18.82

To Fred Martins

Subject: work load.

1. New bolt actions Rifle (m/7 ^{old} action)

Continue work to complete these models with the specifications we set up. Make sure we have a actions ready for Bob Emmon's to stock. This work should be complete by Sept. 82.

2. Scope Mounts:

Scope Mounts should be complete and released to the model shop with the type attachment we discussed. They also should retrofit on our new guns.

#12

3. Fire Control. modifications

- Check test results and follow up with a report on how good the ~~the~~ trigger block/sear block is. A.I report needed on this program. including bolt lock.

~~4~~ I think there is more work on the new bolt action rifle than you can handle alone. I will get with you after the operations Committee meeting and go over the schedules they have set up. Again they want the new gun. and we should proceed to give what we think is needed
