CLEANING INSTRUCTIONS  
MODEL SEVEN INSTRUCTION BOOKLET

Forwarded for comments and Marketing/Legal approval, is a proposed draft of the cleaning instructions for the new Model Seven rifle.

Reference is made to using Du Pont Teflon Wet Lubricant as a cleaning solvent and rust preventive. Detailed steps for cleaning the receiver and trigger assembly have been incorporated. These instructions will also be used in conjunction with other model instruction booklets, with minor revision, where applicable.

Expediting review and approval of these instructions is required if we are to incorporate them into the Model's instruction booklet. Your prompt review is needed by October 20, after which time it will be assumed the instructions meet with your approval, and will be finalized for printing.
