Cleveland, Ohio 44144

From: Dick Jackson
R&D
Remington Arms Co.

Enclosed are two prints (D-exp.1758A) of the NBAR magazine box that depict the addition of six projections to be formed into the box. This is per my telephone conversation with George on 6/8/88.

I've given the position of these projections on the drawing without giving the shape or size. The purpose is to take up extra space in the magazine well. You can choose a shape and size that best suits you (I've shown spherical on this drawing).

If you have any problems or questions, please call me or Fred Martin.

Thank you,

Dick Jackson
