

Why not do the work for free instead of given us a \$20 coupon?

Can I use this \$20 towards new firearms?

I have a model 600 or 660 what do I do with this rifle?

My gun fired when I:

- Closed the bolt.
- Moved the gun safety from safe to fire.
- Dropped or bumped it hard.
- Hang fires (pull the trigger and nothing happens for a second then fires)

I have a rifle without the bolt-lock feature can I get it converted to have the bolt-lock?

How can I tell if my gun has been altered?

- check cleanliness
- check functioning of gun
- have gunsmith review

Safety product including gun locks, hearing and eye protection, and gun safes.

Because this is not a recall there is a cost to the change, however Remington wanted everyone to have an opportunity to receive safety products at a discount.

Most model 600 and 660 rifles (plus some XP-100) were recalled and repaired in 1979 for safety reasons related to the trigger assembly. Model 600 and 660 rifles were manufactured (or retrofitted) with bolt-lock features. If your rifle was not retrofitted as part of that recall, the entire trigger assembly will be replaced at no charge. To check whether your model 600 or 660 rifle, or XP-100, was subject to the 1979 recall or repaired as part of it, please provide us with the serial number of your gun (check in recall book for info on determining if the rifle is or has been involved). To learn more about the 1979 recall, check our web site at www.remington.com.

Your rifle should be shipped to Remington for inspection to:
Remington Arms Co., Inc.
Attn: Product Service- TPA
14 Hoefler Ave.
Ilion, NY 13357

No, Remington will not make that alteration.

If you have any concerns about the safe functioning of your firearm, especially if acquired used or it is an older gun, take it to a RARC gunsmith (or send it to us at Remington) for a complete check-up.
