Dear Mr. Page,

Normally if you just wanted to have your firearm changed from the bolt lock safety to the non bolt lock safety, you would simply send the firearm to us and we would do this modification for \$20. However since you noted that the firearm was not functioning properly, we would like to make an evaluation first before determining if there will be any charges. We recommend shipping the firearm to us via UPS. If the repairs are \$75 or less, we do the work and send the firearm back COD. If the repairs are \$75 or more, we will send you a written estimate before performing any work.

Customer (Ronald Page)

Thankyou for your response, I am replying now within my 48 hrs. I still do not fully understand the details of shipping and repair arrangements(costs). Although i do want the rifle repaired. It is a fine Remington Rifle and I enjoy hunting with it. Thank you for your time, Proud Remington owner, Ronald Page
