Dear Sir,

Thank you for your inquiry. According to the serial number provided, this firearm was manufactured in or around 1995 and does not have the bolt lock safety. It does not need to be modified. If you have any questions, you can contact the Remington Authorized Repair Center in your country at:

HELMUT HOFMANN, GmbH

bolt lock mechanism
my rifle bought in Germany in 1997 does not have the safer version of bolt lock so that it cannot be locked before loaded. My vendor (Frankonia) doesn't know about the security action to improve the safety mechanism. Is there an opportunity in Germany as well and what are the conditions. Thank you.

Manfred
