Dear Cecil,

Thank you for your inquiry. We apologize for any inconvenience you may be experiencing. We suggest taking or sending your firearm to a Remington Authorized Repair Center or our factory for evaluation.

You can locate your nearest repair center by visiting the Repair Information Center in our Support Section and selecting your model and state:

The trigger and safety mechanism on my .243 is hanging up. I cannot fire the rifle or move the safety lever. The bolt action seems to be working ok. I live in the St. Louis area and cannot find a local authorized Remington gun repair shop. One gunsmith told me that Remington has been replacing some of the Model 700 trigger assemblies. I would appreciate any input you can give me.
