Does my 243 caliber youth version rifle have an unsafe safety recall
pertaining to a screw being tightened up allowing it to fire with the
safety on? I was told it does by a florida gunsmith. This rifle was
purchased new by my father and given to me. I plan to give it to my son. He
also said the rifle can be traded back for a comparable other rifle if so
i have liked the 270 caliber for years and that would be my choice thank
you
