Dear Allen:

Thanks for contacting us about the Safety Modification Program for your Model 700. I understand your concern about the safety of your rifle. Basically, by participating in this program, we would either modify the safety arm on your original trigger assembly or replace it with a new factory assembly that does not feature a bolt lock mechanism. However, since you have installed an aftermarket trigger assembly, you are not eligible for this program. If you would like, you may reinstall the original factory trigger assembly and then be eligible to participate. Unfortunately, we will neither warranty nor modify any aftermarket part on our rifles.

If you would like to reinstall your factory trigger and send it in, you may send it via UPS Ground to:

Remington Arms Company
Attn: BL Safety Modification
14 Hoefler Ave.
Ilion, NY 13357

Make sure to include a letter with your name, address, and telephone number so they can contact you for payment. The fee will be \$20 per firearm through the end of the year. You MUST remove your scope. The factory will not touch your firearm until the scope has been removed and will not be liable for any damages to it. I hope this has answered your questions. Should you have further concerns, please contact us at 1-800-243-9700. Thanks and have a great weekend.

After becoming aware of the Richard Barber family's sad accident and the Rem.arms.com.safety modification program, I would like to know when and where I can have the bolt lock removed from my rifle? I understand this program will terminate the end of this year? I would prefer to have it done locally and not have to ship my gun out! I do not have a Remington trigger in my rifle (Canjar) and a Leupold EPS which I don't want to remove! Thank you for the decision to make our rifles safer and your compassion for Gus Barber & family, respectfully Allen J. Dam PS I live in the mid-hudson valley of New York State, nearest city Kingston, N.Y. 12401
