Thank you for contacting Remington Country. Your Model 700 was produced in 1962. Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

i recently purchased an older remington 700 at a gun show and i am wondering when it was made. the serial number is 28800. also you can not open the bolt with the gun on safety. i have been told that remington will fix this for free. is this true and how long will you have the rifle to do this. thanks tom.
