300 ultra 700 sendero has broken two seers in 130 rounds why?

Discussion Thread

Response (Chris) Dear Mr. Griffiths, 8/17/2004 3:30:28 PM

I spoke with you this afternoon regarding your Model 700. You can reach me at 800-243-9700, ext 8705 if you need further assistance.

Customer (james griffiths) 8/13/2004 10:57:05 PM each time the seer broke with no warning! The rife discharged the frist time, as I was closing the bolt. Almost makeing my friend and myself deph. As a result of this malfunction I had the rife (which is less then 2 years old) repaired by my local gunsmith. (TJ gunsatthing.) Thinking this accurance was only a farce. He replaced the damaged seer with a Ed Brown stanless Steel seer. Then today, (less then 1 mounth after the frist seer broke)while rotating from safe to fire the rife discharged again. sending a round wildly off target. Now somtimes the rife fires as bolt is being closed or as safe is moved from safe to time. Please help me solve this problem rite away before I lose all confedence in this rife.

P.S. The following modafacations have been made to this rife. 1= Kick ees pad , mosal brake, ziess scope and rings, triger ajustment 3 1/2 lds

Thanks James Griffiths 3648 S. Laredo St #E Aurora CO 80013
