Dear Mr. Black,

Thank you for contacting Remington Country. His Model 700 was produced in 1968. His firearm has not been involved in a recall. The rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like the firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

My father bought his Model 700 in 1973. He is curious if the gun is part of the reported recall.

The serial number is 671506.
