Dear Mr. Elliott,

Thank you for contacting Remington Country. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

[http://www.remington.com/Safety\\_Modification\\_Program/remington\\_safety.htm](http://www.remington.com/Safety_Modification_Program/remington_safety.htm)

I have a Remington 722, s/n# 726xx, in 300 Savage cal. that I have owned since the late 1960's - I have recently heard that in 2002 there was a safety modification program for this weapon. Please advise. Thank you.

Don Elliott
