Dear Sir, Welcome to Remington Country. Some of the differences are:

- the police sear and trigger engagement are polished
- the police model has a bedding block that runs the full length of the stock while the varmint's bedding block runs the length of the action.
- the police model has a wider fore arm and 2 swivel studs
- police models have parkerized finishes vs. black matte on varmints
- all police models are tested for accuracy

Pricing is not available on l.e. firearms, but usually are more expensive than the standard varmint that has a suggested retail of \$932.00.
