Thank you for visiting Remington Country and for your comments. We still have a full line of knives that are produced in the USA but those are sold at a different, higher price point than those we import. In order to remain competitive with other's products we offer this lower priced line of knives so we can have a product for the buyer that cannot afford our more expensive products but is loyal to the Remington brand.

I own a 700 BDL, .308 Cal, with a serial number of:
66280. No prefix or suffix. Can you tell me what year/month this rifle
was made?

Thank you
