

| | | | |
|--|--|---|---------------|
| M/710 Long Action w/one piece receiver | Roll in full length one piece receiver into long action product line | Will start after M/710 short action EET | Norton, James |
| M/504 Homet | Initially will design around .22 hornet. Intent is to support new ammo cartridge | Initial investigation determined that homet length will fit in receiver length. Major component changes: receiver, bolt, housing housing and magazine box | Norton, James |
| M/597 17M2 | Need bolt weight between LR and Mag. Will use nickel alloy for bolt material or tungsten slug to increase weight | Nickel alloy bolts in process. Tungsten slugs on-site now | James |
| L.E. & Military | Support programs as possible | This represents the amount added to the firearms budget last year to cover L.E. & military expenditures | TBD |
