

Make it a practice to clean your bore every time you're going to shoot. Be sure to clean your entire gun before and after long-term storage and no less than once a year. It's so important to clean your gun whenever it's been exposed to adverse conditions such as rain, dirt, mud, snow, sweat or saltwater.

For safe and dependable operation of your firearm, all parts of your gun must be properly cleaned and lubricated. Periodically inspect the internal workings of your firearm to be sure they're clean and free of rust, powdered dirt and debris.

Use recommended lubricants on your gun and do not over-lubricate. Excessive use of a non-recommended lubricant could adversely affect the function and safe operation of your firearm. Remember, you are responsible for the proper care and maintenance of your firearm. Failure to properly maintain your firearm can not only damage or ruin your firearm, it can expose you and others to unnecessary risks of personal injury or death.

Remington® has a wide range of firearm care products and resources for best results when cleaning your gun. Everything from solvents and lubricants to rods and patches. They're all available near you. Remington dealers.

10th COMMANDMENT

Learn the Mechanics and Handling Characteristics of Your Firearms.

Not all guns are alike. They have different mechanical characteristics that dictate how you should carry and handle them. Anyone who plans to use a firearm should first become totally familiar with the type of firearm it is and the safe handling procedures for loading, unloading, carrying, shooting and storing it.

Before you even unpack your new Remington firearm, read this instruction book from cover to cover and familiarize yourself with the different mechanical aspects of the gun. Then read, understand and follow the Ten Commandments of Firearm Safety in this book.

WARNING! Discharging firearms in poorly ventilated areas, cleaning firearms, or handling ammunition may result in exposure to lead. A substance known to cause birth defects, reproductive harm, and other serious effects. In any case, have adequate ventilation when using lead-based products thoroughly after exposure.

SHOOT SOBER!

There's one other rule that must be followed when handling firearms. Total respect for this rule is necessary in order to effectively practice the Ten Commandments of Firearm Safety. The rule is: SHOOT SOBER! Guns and alcohol or drugs make a deadly combination. Never consume anything that could mildly impair your judgment or physical coordination when you're using a firearm. A staggering percentage of the shooting accidents that occur every year involve alcohol or drugs. Be smart. Always drink sober and stay alive.

WARNING! Failure to follow any of these safety rules may result in serious injury or death to the shooter or bystanders and damage to property. Use common sense and good judgment, understanding and practicing the Ten Commandments of Firearm Safety. If you have any questions about the handling of a Remington firearm, write to: Remington, 1A Firearm Command Center, P.O. Box 200, Madison, NC 27026-0200, or call us at 1-800-243-0790.

SPECIAL SAFETY RULES FOR MUZZLELOADERS

In addition to the Ten Commandments of Firearm Safety, there are several guidelines specific to black powder guns, hot muzzleloaders and muzzleloader rifles. Make sure their safety and the safety of others. The following is a brief overview of these guidelines. For full details, thoroughly read this instruction book.

MUZZLELOADING SAFETY RULES

- 1. NEVER** smoke while using your muzzleloader or while near any quantity of black powder or PYRODEX®.
- 2. BEFORE LOADING, MAKE SURE THE FIREARM IS NOT ALREADY LOADED.** To make sure it is unloaded, insert the ramrod provided with the muzzleloader into the breech plug and note its position at the muzzle. It should be approximately 1/4 inch below flush with the end of the barrel if the rifle is not loaded.
NOTE: Nothing can be attached to the ramrod while using it in this way. USE ONLY THE RAMROD PROVIDED.
