

Ammo

For **Untra Mag** you need **thicker jacket** for **velocity**.

Thicker hide on animal thicker jacket needed.

To get most **accurate** gun ammo **combo-Practice**.

Whitetail Corelock & .30-06 rifle.

30-06 & 270 are 99% of calls.

Bullet weight x velocity = energy

Heavier faster = more punch

Hollow point in rifle bullet is mainly used **for target** because helps w/**accuracy** (flight path) and rotation-(spin). More aerodynamic.

Soft Point expands better.

Nosler Partition is a **bonded** bullet. **Core** is bonded to **jacket**.
Not good for varmint.

Any time you get **heavier bullet** you have a **better bullet**.

Boat tail is **tapered** smaller towards bottom. For more **velocity & accuracy**.
(perception).

Does help a little w/ **draft**.

The **diameter** of a bullet actually **doubles** with impact.
