

## REMINGTON EXPANDS ITS LINE OF UMC® RIFLE CARTRIDGES

**Madison, NC** – The Remington UMC brand of ammunition has provided the high-volume shooter with uncompromised quality and value for decades. This brand covers a broad spectrum of the most sought after pistol, revolver, and centerfire rifle calibers.

To further meet the needs of today's volume rifle shooter, Remington-UMC has expanded its offerings for 2005 to include the popular 50 grain Jacket Hollow Point loadings of 223 Remington and 22-250 Remington cartridges. The higher ballistic coefficient of the 50 grain JHP bullet provides greater down-range performance with less wind drift making these the perfect choice for varmint hunting.

All UMC ammunition is made in our Lonoke, Arkansas manufacturing facility using only first quality components to provide the best value for practice, personal defense or hunting. The UMC brand of rifle ammunition is loaded in seven popular calibers.

Offerings for 2005:
