

## THE NEW 45 GAP CARTRIDGE - NOW AVAILABLE IN REMINGTON® UMC® HANDGUN AMMUNITION LINE

**Madison, NC** To continually meet the changing needs of today's high volume shooter, Remington has expanded its American-made UMC line for 2005. Now fans of the new **45 GAP (Glock Auto Pistol)** will have easy access to more affordable high quality practice and training ammunition. The Remington UMC handgun ammunition line will include 45 GAP in both 230 grain Metal Case and Jacketed Hollow Point versions.

The 45 GAP was designed to provide 45 Auto performance in a shorter case, with similar overall length to the 9mm and 40 S&W cartridges. The UMC 45 GAP offerings will deliver outstanding accuracy and reliable feeding in the more compact, smaller framed handguns, resulting in a more comfortable balance of size and power for training or personal defense ammunition.

Remington's UMC brand of ammunition has provided the high-volume shooter with uncompromised quality and value for decades. All UMC ammunition is made in our Lonoke, Arkansas manufacturing facility using only first quality components to provide the best performance and value for practice, personal defense or hunting. UMC ammunition covers a broad spectrum of the most sought after pistol, revolver, and centerfire rifle calibers.
