REMINGTON® NITRO PHEASANT™ LOADS - THE ULTIMATE PHEASANT LOAD FOR THE SERIOUS UPLAND HUNTER

Madison, NC Late season pheasant hunting can test the skill, patience, and especially, the ammunition, of the serious upland hunter. New for 2005, Remington has tilted the odds in the hunters' favor with the introduction of Remington **Nitro Pheasant** shotshell loads.

Specifically designed to deliver maximum performance, Nitro Pheasant shotshells consist of premium, extra hard, Copper-Lokt® plated shot, protected by Remington's famous Power Piston® wad, and encased in a unique sparkle hull design that sets it apart from other offerings.

New Nitro Pheasant high brass loads deliver a 12 gauge, 1 1/4 oz. payload at 1400 fps and a 20 gauge, 1 oz payload at 1300 fps. These high velocity loads provide an increase in overall payload energy and individual pellet energy for outstanding results at extended ranges. For hunters that prefer a magnum shot charge, Premier Pheasant loads are also offered in 12 gauge, 1 3/8 oz. payload at 1300 fps and a 20 gauge, 1 1/4 oz payload at 1185 fps.

2005 New Offerings
