

REMINGTON

870 POLICE VS 870 EXPRESS/HOME DEFENSE

870 POLICE SHOTGUNS GO THROUGH A SPECIAL 21 STATION "POLICE CHECK" SECTION. THESE CHECKS INCLUDE MANUAL CHECK FOR BURRS, VISUAL CHECKS FOR IMPROPER TOOLING MARKS, AND A MULTIPLE OF OTHER CHECKS TO INSURE POSITIVE FEED AND FUNCTION.

DUE TO HEAVY RECOIL IN BUCK AND SLUG LOADS, ALL 870 POLICE GUNS HAVE A LONGER MAGAZINE SPRING. THIS HEAVIER MAGAZINE SPRING HOLDS THE SHELL AGAINST THE SHELL LATCH REGARDLESS OF THE RECOIL INVOLVED.

A DIFFERENT SEAR SPRING IS USED IN THE 870 POLICE; THIS SPRING WILL GENERATE A TRIGGER PULL BETWEEN 5-8 LBS.

A HEAVIER CARRIER DOG SPRING IS USED IN THE 870 POLICE TRIGGER ASSEMBLIES. THIS ENSURES THAT WHEN THE CARRIER ELEVATES THE SHELL, IT WILL BE HELD THERE UNTIL THE BOLT CAN PUSH IT INTO THE CHAMBER. THIS IS A BENEFIT WHEN SHELLS WITH A HEAVY PAYLOAD ARE USED, SUCH AS 00 BUCKSHOT OR SLUGS.

870 POLICE SHOTGUNS ARE EQUIPPED WITH A "MAGAZINE EMPTY" BLAZE ORANGE MAGAZINE FOLLOWER.

870 POLICE SHOTGUNS COME STANDARD WITH SLING SWIVEL STUDS INCLUDED.

THE 870 EXPRESS/HOME DEFENSE (870 EXPRESS 18") DOES NOT INCLUDE ANY OF THE ABOVE FEATURES.

THE 870 EXPRESS WILL NOT ALLOW FOR THE ADDITION OF A MAGAZINE EXTENSION TUBE, UNLESS PHYSICAL MODIFICATIONS ARE MADE TO THE TUBE AND BARREL. MODIFICATIONS ON THE FIREARM MAY NULLIFY THE WARRANTY.
