Subject: Re: ISS CA DOJ Certification - Project Summary

All Research activity relative to certification in the state of California of ISS equipped firearms has been discontinued and this project has been closed. No further work is planned to qualify additional models. A final report summarizing all work under this Project (# 241328) is complete and will be distributed to the various sites. Copies of this report are being sent to Steve Perniciaro in Ilion and John Trull in Madison. E-town will retain the original report on file.

At project closeout the following systems were approved as CA DOJ ISS systems:

- * M/700 - All Variants
- * Common Fire Control (2-Dot Aluminum version) - All Variants
- * Common Fire Control (2-Dot Synthetic version) - All Variants

These systems are grand fathered as approved, even if they are not offered for sale at this time. For instance, if Remington should decide to implement the Common Fire Control 2-Dot version, the California DOJ only needs to be contacted that this system is now offered for sale.

If anyone has any questions relating to this activity or report please contact Marlin Jiranek or myself.
