Bob,  
this gun is now in Arm Service.....  
Not sure if Chris had the chance to see but it appears that they are repairing.....

Should not be retruned to customer.....RGA was issued.

Repair #73363  
RGA #60038346

> Thanks Danny, I will have gun examined when it arrives. I have seen this condition on one other  
firearm. The trigger did not protrude outside the guard but it came pretty close. In that case it looked as  
though the fire control assembly had been struck, prior to the stock being assembled. I'll let you know  
what we find out after we examine the firearm.

> Chris,  
> One of the CSR's received a call this AM from a Lynn's Leisure Times (dealer) in  
Davenport, NY...Had a 673 guide rifle in 350 Rem Mag  
> stated that the trigger was so far off center that it was nearly outside of the trigger guard  
& created a liability issue. He was going to return  
> gun back to the factory....apparently lives relatively close.  
> He had also spoken to Jerry's (dist) from whom he had purchased. They had same  
issue.

> I contacted Jerry's & spoke with Richard (head of purchasing) he did have (1) gun that  
he had opened & inspected & found  
> trigger off center...did not protrude beyond trigger guard, but trigger was parallel with  
one side of trigger guard.

> I have issued an RGA for this gun to be returned to Ilion.....Attn: Bob Longo RGA  
#60038346...

> He will wait till this gun is received at the factory & we have had the opportunity to  
inspect the TPA and advise on how to proceed.

> Sent this one directly to factory & att: Longo so that hopefully it will find its way to Bob  
even if during shut down
