Ed and John,
　　　　I'm looking for input on activities for the Research & Technology group for next year. The attached list was put together by the group. There's not a lot of detail but I'm sure you can get a flavor for what they're about. Please review this list and identify the projects you have the most value for. Feel free to propose your own activities as well. As you both know, a good way to get things like the "Recoil Simulator" done on somone else's budget!

Thanks for your input,
Scott
