Thanks John. I hesitated to get you involved but I had asked Dave to send the gun that needed the bolt to the factory on January 14th and he still had it. I told the customer that I had instructed Dave to send it back to us so he was not happy!
Thanks again.

One is bolt lock safety modification and very dirty, that is going back to customer tomorrow the other is the riveted style extractor that gunsmiths had trouble getting extractors for, that is coming to factory.
