Remington® Offers High-Volume Handgunners New Alternatives for 2003

Madison, NC – The UMC® LeadLess® brand covers a broad spectrum of the most widely used pistol and revolver calibers that perfectly cover your needs at the practice range. For 2003, UMC LeadLess will be offered in 9mm Luger 124 grain and a 357 Magnum 125 grain Flat Nose Enclosed Base (FNEB).

Virtually eliminating lead exposure at the firing line, UMC LeadLess pistol and revolver ammunition is comprised of a lead-free and heavy metal-free primer and Flat Nose Enclosed Base bullet that prevents lead vaporization from the bullets base upon firing. In addition to providing a cleaner practice environment, the combination of Remington's industry leading HMF primer and FNEB bullet provide a round that shoots cleaner for more reliable gun function and easier cleaning.

Offering for 2003:

UMC® LeadLess® Pistol and Revolver

	Cartridge	Bullet Wt.	Bullet Type
