It was a pleasure to meet you and Dan Diaz on Friday in Detroit. It was great to finally put a face with a name and a voice. I would also like to take this time to apologise to both you and Dan for my vendor not being as prepared as he should have been for our visit to his facility. I will attach copies of the process as requested by Dan. If they are too dark or not legible please call me and I will either send you a disk or place the copies in the mail.

Prior to my departure I removed the long insert core from the mold. As discussed I will plate the core and the front lob geometry to achieve the dimensions you have called out on print numbers 1E-300327 and 2E-300327. I will keep you informed as to the status of the core and my next sampling date.

I trust your assembly over the weekend went without a hitch. Once again thank you for consideration and understanding in this program.

Regards,

Rich Kusko
Program Manager
