We can scan the drawings at Duplicator Sales and Service in Etown. The cost will be around \$40. I am waiting until this afternoon to see if Mike has any success with SmartTeam.

Not sure. You could get McCollum looking. Ilion is also another possibility.

Subject to Protective Order - Williams v. Remington

ETE00000049

At the moment Mike is working on removing operating system updates that may be causing SmartTeam problems. He will keep me posted on his progress.

In the meantime we still have paper drawings of all Mayfield DCR's going back several years. Is there a local place we can get drawings scanned into pdf format?

Guys,

What's the outlook to get the 710 drawings for the fire control and bolt?

Scott
