Oops! I meant "Sear Retaining Pin"

I will add the information to the notes.

Thanks,

Gerald

Thanks for the meeting notes. Just a few questions:

- 1) How much time on average between first article inspection date and Production run if we can assume parts are to print?
- 2) Ownership of changes to Owners Manual and Field Service Manual if necessary.
- 3) SPL Issues: You have called out the Sear Pivot Pin. Are you referring to the Sear Retaining Pin EXP9501?

Thanks again, Will
