Phillip,  
The engagement spec. is .020-.025 for std. cal. and .025-.030 for magnums.  
Gerald

Gerald, on the 710 sear/trigger engagement, is the spec still .020-.025 for std. cal. & .025-.030 for magnums? Or is it .025-.030 across the board for all 710 product?

Phillip
