**Subject:** RE: Quick Status

Thanks,

Please get with Snedeker sometime this week and prepare a brief summary of 504 testing. I think what we want is a listing of issues existing DAT, like part breakage, etc. + known deviations of parts, processes, etc.. I'd like to issue a post DAT exit letter like we have on other tests. Sorry about the extra demands here. We need to separate these things between you, me and Jim.

Scott

> Phillip,

> Do me a favor a put together a quick status on 710 Magnum testing. Nothing elaborate, what's done and a brief on results to date for function, meas., etc.. Also a reminder to send Trull a note requesting all 10 597 LR's for the audit be sent to E-town. Tell him to not worry about cleaning his, we'll do that. And finally, have we received all Non-ISS trigger assemblies back from Mayfield? If we have what's the outlook for testing these?

> Just want to be in a position to answer questions before they start. Last question, where are we on 504 DAT Drop testing?

> I'll let you know if and when we have a conf. call with the BATF. WOULD like you there.

> Thanks.
