Subject: Monthly Report

Dale,

Attached is MR for April. Contains a short update on Steel Shot Status. Will meet when we return to discuss outlook with Metaltec. In a nutshell, the big stuff is ugly. Many voids and shape problems. Outlook for #2 and smaller shot is much better. This size range would take care of the majority of our volume requirements. Jim and I plan on leaving around noon. Call if you want to discuss anything before then. I'll forward Telephone #'s if you need to get in touch tonight or tomorrow.

Scott
