Subject: Activity for W/E 12/16/05

Bob,

Here is the rundown on my activities for the week ending 12/16/05:

Investigated and corrected bolt process for M700 RMEF GOY

F202851,F202859 RME XCR Bolts

Finalized PPI for 202357 M750 Gas Lug

SPL Issues – Ongoing involvement in process development,

Contacted JGrippe about tooling improvements in the new gen bolt line,
now that it appears that we will keep this item in house for the M750.

Filed numerous TDR's for routine tool revisions.

Spent 2 hours with Gary Bennet investigating dead safe issues for current 700 fire control.
