Danielle

Thank you for the inspection. I have a few thousand of these parts in my office that I am going to send out to plate. Before I do I would like to increase the sample lot of inspection. The parts that you checked for me are within specification. Would you please check another 50 of each? You can pick the parts up from my office or I can have them delivered to you. A random selection of 50 each pre and post plate will be adequate. You can mix them back into the entire lot when complete.

Thank you

Bryan

Once Danielle has completed the inspection we will ship parts out for plate. You will have to plate these on a PO. We don't need to keep the parts Danielle inspected separated. We can plate the entire lot. Please contact Danielle when complete. Thank you

Attached is the report for the surface finish for the triggers and sear safety cams. The data recorded is for both before and after plating. If any further information is needed please contact me.

Thanks
