**Subject:** Activity for Week ending 9/30

Bob,

The majority of last week was spent getting the

Engis Bore Hone Machine operational. We have not used

This piece of equipment since it's successful runoff 6 months ago.

The operator and myself have been struggling to relearn how to operate the

This piece of equipment so that Sear Safety Cams and Triggers are available

For the UGT runoff.

The rest of my week was also spent on SPL issues.

Craig S. Becker
