We apologize for any inconvenience you may be experiencing. We suggest telling your dad and then have him take or send the firearm to a Remington Authorized Repair Center or our factory for evaluation. We would need to see the firearm first hand to repair this.

You can locate your nearest repair center by visiting the Repair Information Center in our Support Section and selecting your model and state:

i was cleaning my 710 and i had the bolt extracted and off the reciever. the plastic end (with safety mechanism) popped out and gave me access to the firing pin, spring, bolt head, and the little lock peoce that holds it all together. well the problem, is i can't get it to go back together. i think i turned the bolt while it was out, and nothing lines up correctly so it can be put back into the reciver as on unit again. MY FATHER DOES NOT YET KNOW, PLEASE HELP ME!!!!
