I find myself in dire need of a cocking cam for a short action Rem 700  
.308 bolt face. I'm referring to the cap on the end of the firing pin  
that is pinned to the actual pin retaining the spring. bottom of cam  
engages sear. HELP! How may I purchase above item? I do not need a  
complete pin assembly nor complete bolt assembly.  
Thank you,  
D C Barber
