Dear Sir,

We do not recommend that you alter your trigger, nor do we release this type of information. Triggers can be adjusted by the Remington factory only.

Being knowledgeable in firearms repair, I want to adjust my trigger pull. I located the sear, pull and overtravel screws on my 700 bdl and removed the coating on them. The trigger pull is way to heavy to hunt or shoot with. All I need to know is what screws do what and I can customize the gun to my satisfaction. Thanks,

Dewayne
