Dear Mr. Wood:

Welcome to Remington Country!

Our firearms do not feature a three position safety.

We do have an Integrated Security System within our firearms, including the Model 700.

The Integrated Security System will not allow the bolt to be closed when the security system is engaged.

This system is engaged or disengaged by using a "J" key.

Thank you for your interest in Remington products.

Does Remington make a three position safety for the Model 700 that can lock the bolt from opening with the safety on?
