Dear Doug,

Thank you for your inquiry. You can have your older firearm with the bolt lock safety changed to a non bolt lock safety through our factory or Remington Authorized Repair Center.

You can locate your nearest repair center by visiting the Repair Information Center in our Support Section and selecting your model and state:

I have two Model 700 ADL rifles both 30-06 Springfields. One purchased by my father in the 1970's and one by me in the late 1980's. The older one must be placed on "fire" to open the bolt while the newer one can have the bolt opened with the safety in either position. My questions are:

1. Can the older rifle be modified to the newer safety design?
2. Can I purchase these parts myself and install them myself?
3. What parts do I need?
4. How much do they cost?

thanks,

Doug Pascoe
