Dear Mr. Valente,

According to the information provided, there is not a call back on your firearm. If you would like to have your firearm changed from a bolt lock safety to a non bolt lock safety, you can do so by sending your firearm to a Remington Authorized Repair Center or to our factory. There is a nominal fee to have this work performed. If you have any further questions, please contact our Consumer Service Department at 1-800-243-9700.

CONFIDENTIAL

My rifle is of the vintage that you must move the safety to "off" in order to open the bolt to unload. There have been several fatal accidents with this model in the past two years. These occurred because the rifle fired when the safety was moved to the off position. I was informed that Remington has issued a recall to correct the problem. Please give me information on the procedures for getting my rifle retrofitted so this safety problem is remedied. Thank you.
