Dear Sir/Madam,

Thank you for your inquiry. We can not advise on the adjustment of the fire control system on any of our firearms. We sincerely request that you return that rifle to either a Remington Authorized Repair center or to our factory to have the trigger reset to factory specifications. You can locate your nearest repair center by visiting the Repair Information Center in our Support section and selecting your model and state:

i hav a m-700 in 6mm that a friend barrowed to hunt with. he re-adjusted the trigger and made it to light. now when i bump the butt to hard , it fires.i want to re-adjust it myself,cause it will cost me to much to send it back to you. ups and fed-x are thieves when you ship a rifle from up here.i am good with minor gunsmithing and should be able to do this.i just need a little bit of your help as to which screw to loosen and which to tighten.and i sure don't want to ask the person who screwed it up.thanks guys Del
